

The Learning Portal

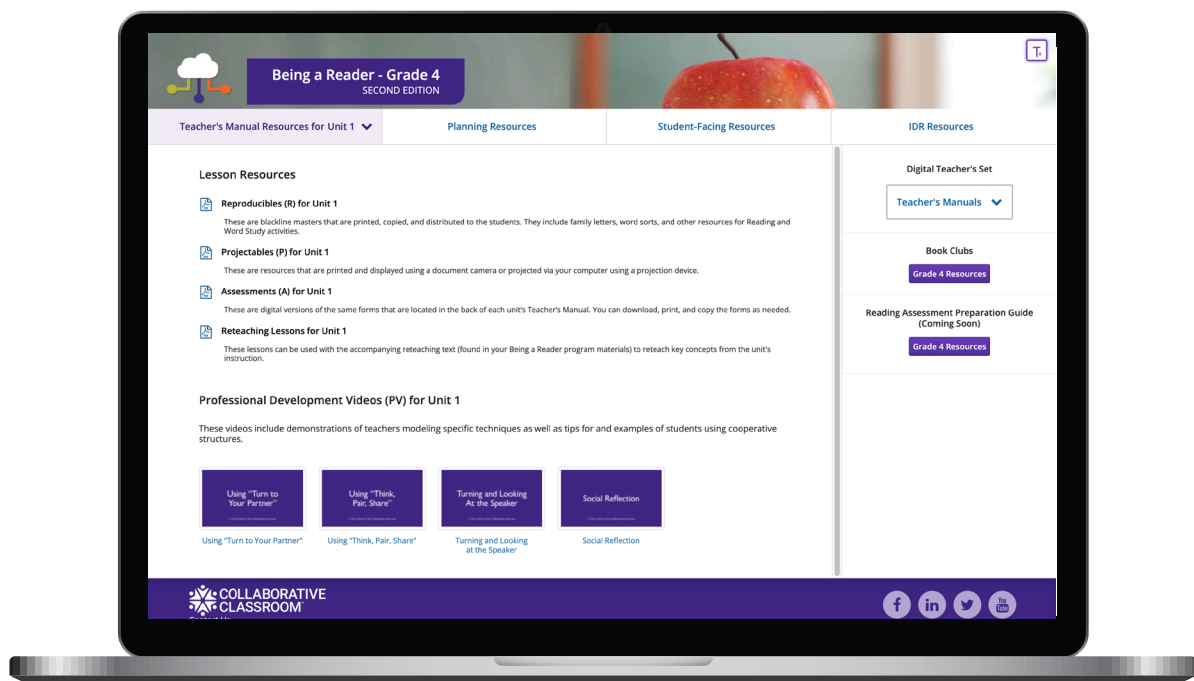

Learning Portal

Home to all Collaborative Classroom digital resources, the Learning Portal is an essential and powerful implementation support system.

Using easy-to-manage apps and an intuitive layout, the Learning Portal is where educators:

- Access digital manuals and implementation resources
- Print student consumables
- Administer and share paperless assessments
- View assessment reports
- Engage with just-in-time professional learning resources
- Receive the latest communications, updates, and instructional pacing notifications
- Access program-specific teacher- and student-facing applications

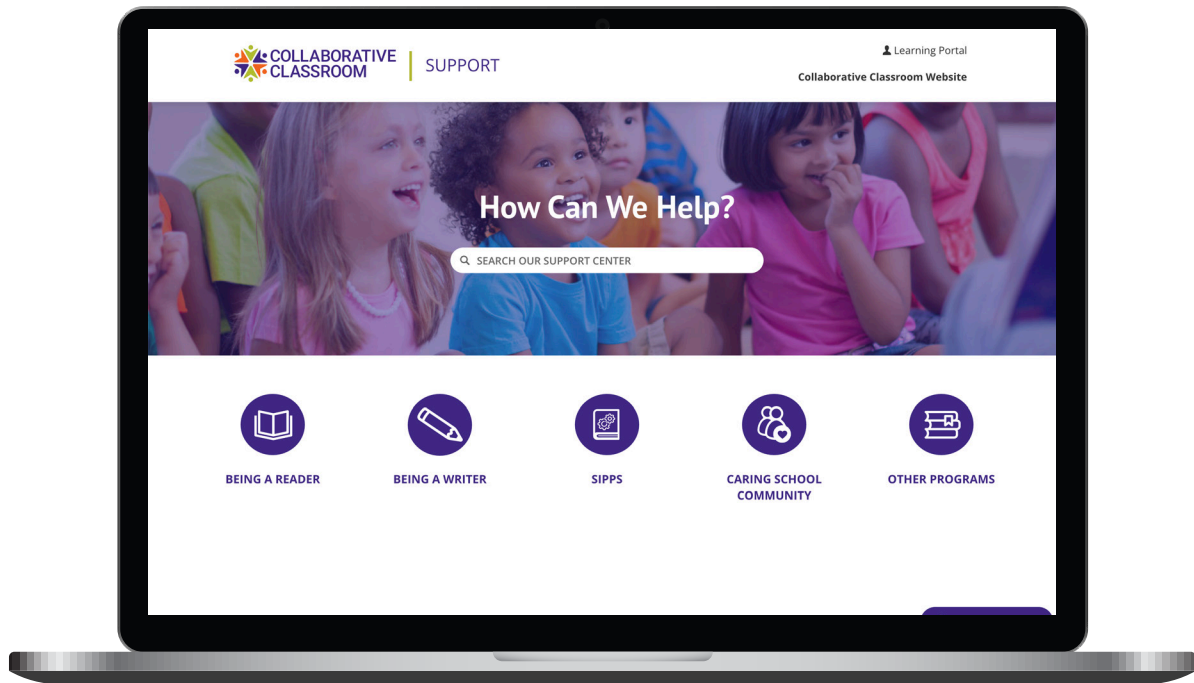

Watch a 4-minute video about the power of the Learning Portal: collabclass.gallery.video/learning-portal-overview

Supports for Teachers

SUPPORT CENTER

Collaborative Classroom's Support Center provides a forum for educators to find answers to frequently asked questions. They can browse, search a collection of program-specific content articles, or submit a question to our Chat Agents.

If a Collaborative Classroom Chat Agent is available to chat, program users can receive answers to curriculum-specific questions in real time.

COLLABORATIVE CLASSROOM > SIPPS > INSTRUCTIONAL DECISION MAKING

Why is using a choral response important and how can I support it?

3 months ago · Updated [Follow](#)

SIPPS instruction is most effective when all students consistently respond chorally rather than individually. The use of choral responses affords every student the maximum amount of accurate practice necessary to build independence. It can also be supportive of readers who may be hesitant or reluctant to respond individually.

To support choral responses:

- Use sufficient wait-time before prompting students to respond.
- Require that students wait for your verbal and physical prompts before responding.
- Have students respond to error corrections chorally.
- If students don't respond chorally, provide a reminder of the expectation and repeat the prompt.

Articles in This Section

- How can I gain student buy-in in middle and high school SIPPS instruction?
- Why is using a choral response important and how can I support it?
- Why are there multiple lists of words in SIPPS? Which list do I use?
- What if I can't finish a SIPPS lesson in 30 minutes?
- What do I do when my students finish a SIPPS level? Do I move up to the next level?

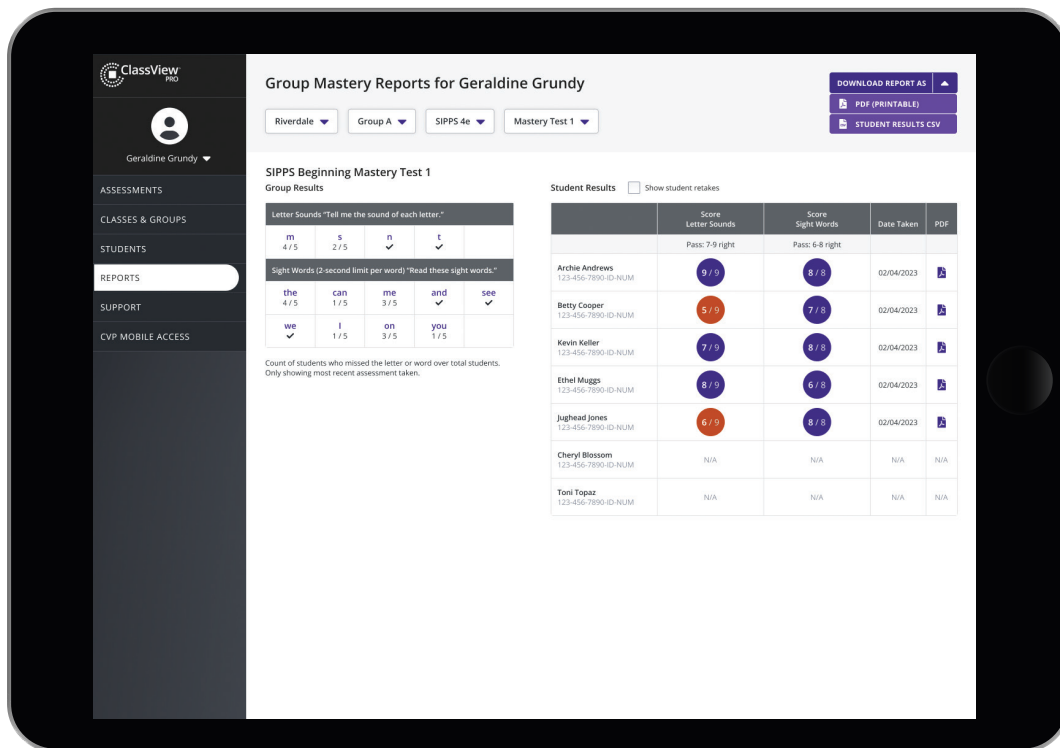

Supports for Teachers *(continued)*

CLASSVIEW PRO

The ClassView Pro assessment app simplifies collecting, synthesizing, and sharing student assessment data, portfolios, and reporting.

Teachers can:

- Digitally record Placement Assessments and Mastery Tests for *Being a Reader* Small-Group Reading and *SIPPS*
- Examine group Mastery Test results for *Being a Reader* Small-Group Reading and *SIPPS*
- Explore assessment results for the *Being a Reader*, *Being a Writer*, and *SIPPS* programs
- Track data to monitor student progress
- Export assessment results to share or review offline

Supports for Teachers and Leaders

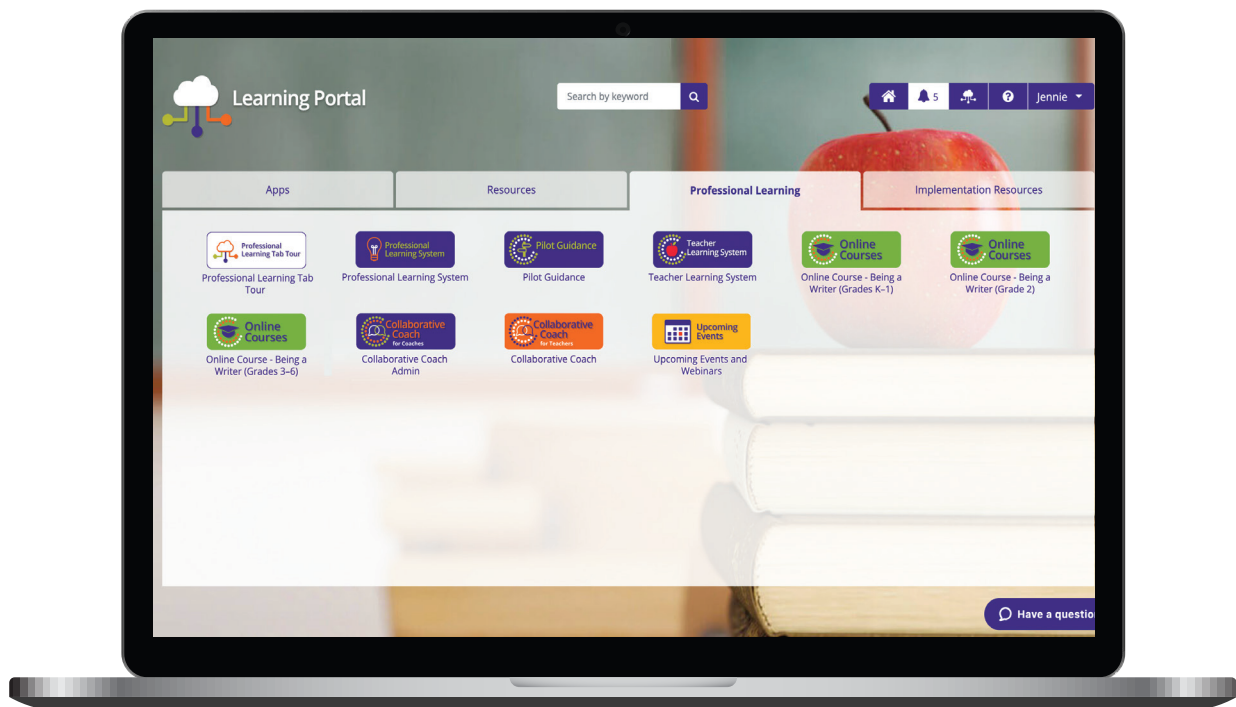

PROFESSIONAL LEARNING

The Professional Learning section of the Learning Portal provides access to professional learning resources at both the district/school and individual teacher levels, including:

- The **Professional Learning System (PLS)**, which provides a roadmap for a systematic approach to professional learning and the resources that support both teachers and leaders in initial and ongoing learning
- The **Teacher Learning System (TLS)**, which provides teachers with self-guided professional learning and program support; the TLS provides learning

opportunities for new and experienced implementers of the *SIPPS*, *Being a Reader*, and *Caring School Community* programs

- **Collaborative Coach**, which is a personalized, video-based asynchronous coaching experience that provides one-on-one coaching for individual teachers, coaches and leaders of the *SIPPS*, *Being a Reader*, and *Caring School Community* programs as well as adults participating in SEEDS of Learning professional learning

Supports for Administrators

COLLABORATIVE LEADERSHIP COMMUNITY

The Collaborative Leadership Community (CLC) is an innovative platform that provides critical information and tailored support to implementation leaders and organization administrators.

Accessed via the Learning Portal, the Collaborative Leadership Community serves leadership and administrative needs throughout the school year by delivering timely and targeted information, resources, and support for strengthening your successful implementation of Collaborative Classroom programs.

Curated Support for Leaders and Organization Administrators

Access professional learning tailored to your needs as you have time in your busy schedule.

Stay informed about upcoming leadership events and webinars.

Get insights about leveraging Learning Portal resources.

Organization Administrator

The Organization Administrator (Org Admin) plays a vital role in supporting a successful digital implementation of Collaborative Classroom programs. The duties of this role include managing educator Learning Portal accounts, interacting with and supporting teachers, and disseminating vital information from Collaborative Classroom to teachers.

Assigning an Org Admin for your district/school has many benefits, including:

- Access to timely support from Collaborative Classroom through email notifications and webinars
- Strengthening your implementation of Collaborative Classroom programs through teacher engagement with essential resources on the Learning Portal
- Increasing district/school capacity through customizing your Learning Portal implementation and developing systems for managing your account
- Access to aggregated student digital assessment data through district- and school-level reports including district and school roll-up and drill-down (placement levels and mastery test results) as well as quick search capabilities of student assessment history across all schools

Tech Tools and Features

OPTIONAL TECH SSO/ROSTER MANAGEMENT

In addition to the management features provided to all Learning Portal users, Collaborative Classroom offers the option to add **Tech SSO/Roster Management** for a one-time fee of \$1500/district.

Tech SSO/Roster Management includes the following expanded tools and features:

Single sign-on (SSO) simplifies teacher access, streamlines login and password management, and links teachers to district or third-party portals and other learning management systems.

Auto-provisioning allows for seamless creation of educator Learning Portal accounts. Accounts are automatically activated with the first visit to the Learning Portal.

We support these SSO protocols:

- SAML 2.0, OpenID Connect (OIDC), Google, Microsoft ASFS/Azure
- Various third-party Identity Management systems

We have SSO integrations to:

- ClassLink LaunchPad and other SAML-based platforms

Automatic roster management synchronizes school rosters via Collaborative Classroom–managed CSV upload.

- We currently support roster management with any source system (e.g. ClassLink, SIS) using OneRoster 1.1/1.2 formatted CSV files transmitted via Secure File Transfer Protocol to our secure servers.
- We also support our own native file formats which can be generated via Excel or other CSV tools.

Questions about the Tech SSO/Roster Management option?
