# SIPPS, Fifth Edition

Components Sold Separately to Support Previous SIPPS Editions

The latest edition of *SIPPS*<sup>®</sup> features exciting new components that can be purchased separately to enhance the third and fourth editions.

While earlier *SIPPS* editions remain highly effective, and the instructional design of the program hasn't changed, purchasing any or all of these fifth edition components will ensure you have the most up-to-date resources for supporting your students.

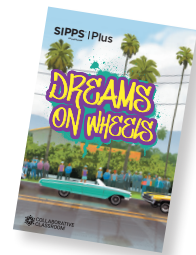

## Student Books

**Beginning Level Little Books** now include updated illustrations and two new characters, but the text is largely unchanged. The **Story Posters** have been updated to match the books.

**The Decodable Books for SIPPS Collections for Beginning and Extension Levels** now include even more texts. These enhanced supplemental collections now include a total of 42 fiction and nonfiction books for Beginning Level and a total of 75 books for Extension Level.

***Dreams on Wheels, Fifth Edition for SIPPS Plus*** replaces 7 selections to provide richer and more current content for students and includes 22 new selections for review and practice.

## CC PAL Student App Offers Instructionally Aligned Independent Retrieval Practice

The CC PAL app gives students daily, targeted, independent retrieval practice aligned to their *SIPPS* instruction. With “just-right” interactive practice activities and connected text reading, students get the engaging, effective practice they need for foundational skills mastery, while educators receive real-time progress tracking data.

## Handheld Cards Provide Additional Support

The **Handheld Spelling-Sound Cards** now have articulatory gesture and pronunciation guidance on the back of each card to support teachers with delivering in-the-moment guidance as students learn and practice the articulation and pronunciation of new sounds.

The **Handheld High-Frequency Word Cards** continue to support a spell-out strategy (read-spell-read) for introducing high-frequency words. In addition, the back of each card now identifies any regular sounds that have been previously taught to support direct instruction in connecting letter-sound correspondences.

## Phonics Manipulative Kit for Hands-On Learning and Practice

The new Collaborative Classroom Literacy Kit for *SIPPS* Beginning and Extension Levels contains three-letter word puzzle cards, a letter-tracing sensory pad, a magnetic dry-erase activity tray, Elkonin boxes, phoneme phones, word-building magnetic tiles, and upper- and lower-case magnetic foam letters, stamp sets, and alphabet puzzle cards.

## NEW *SIPPS* Challenge Level Vocabulary Supplement

The *SIPPS* Challenge Level Vocabulary Supplement offers an optional series of 75 lessons in morphemic analysis to help students identify and use meaningful word parts to infer word meanings. The materials include two teacher's manuals—one for Lists A and B and another for List C—and additional practice passages on the Learning Portal for reading the words in context.
